

Mallala Primary School

SunSmart Policy

This applies to all school events on and off-site.

Rationale

A balance of ultraviolet (UV) radiation exposure is important for health. Too much of the sun's UV radiation can cause sunburn, skin and eye damage and skin cancer. Too little can lead to low vitamin D levels. Vitamin D is essential for healthy bones and muscles, and for general health. Sun exposure during childhood and adolescence is a critical factor in determining future skin cancer risk..

UV radiation cannot be seen or felt and differs from infrared radiation, that we feel as heat. UV levels are determined by a range of factors, but not temperature, and UV levels can be high even on cool and cloudy days. Damage from UV radiation is cumulative and irreversible.

Objectives

This SunSmart Policy has been developed to:

- encourage the entire school community to use a combination of sun protection measures whenever UV Index levels reach 3 and above
- work towards a safe school environment that provides shade for students, staff and the school community at appropriate times.
- ensure all students and staff have some UV exposure for vitamin D
- assist students to be responsible for their own sun protection
- ensure that families and new staff are informed of the school's SunSmart policy.

Local sun protection times and UV levels are checked daily on www.bom.gov.au/uv/index.shtml or SunSmart app, and are communicated to the whole school.

The school uses a combination of sun protection measures for all outdoor activities during terms 1, 2, 3 and 4.

*** 2 and Below UV rating no hats required**

*** 3 and Above UV levels hats are required**

1. Clothing

Sun protective clothing is included in the school uniform/dress code and sports uniform. The clothing is cool, loose fitting and made of closely woven fabric. It includes shirts with collars and elbow length sleeves, longer-style dresses and shorts and rash vests or t-shirts for outdoor swimming.

2. Sunscreen

- The school supplies SPF 30 or higher broad spectrum, water resistant sunscreen for staff and student's use.
- Strategies are in place to remind students to apply sunscreen before going outdoors.
- With parental consent, students with naturally very dark skin are not required to wear sunscreen to help with vitamin D requirements.

3. Hats

All students and staff are required to wear hats that protect their face, neck and ears e.g. legionnaire, broad brimmed or bucket hats, whenever they are outside. Baseball or peak caps are not acceptable.

4. Shade

- A shade audit is conducted regularly to determine the current availability and quality of shade.
- The school council ensures there is a sufficient number of shelters and trees providing shade in the school grounds, particularly in areas where students congregate e.g. canteen, outdoor lesson areas and popular play areas.
- The availability of shade is considered when planning excursions and all other outdoor activities.
- In consultation with the school council, shade provision is considered in plans for future buildings and grounds.
- Students are encouraged to use available areas of shade when outside.
- Students who do not have appropriate hats or clothing are asked to play in the shade or a suitable area protected from the sun.

5. Sunglasses [optional]

Students and staff are encouraged to wear close-fitting, wraparound sunglasses that meet the Australian Standard 1067:2016 (Sunglasses: Category 2, 3 or 4) and cover as much of the eye area as possible. Novelty tinted glasses do not protect against UV damage.

6. Staff WHS and role modelling

As part of WHS UV risk controls and role modelling, when the UV is 3 and above staff will:

- wear sun protective hats, clothing and sunglasses when outside
- apply SPF 30 or higher broad spectrum, water resistant sunscreen
- seek shade whenever possible.

Families and visitors are encouraged to use a combination of sun protection measures e.g. sun protective clothing and hats, sunglasses, sunscreen and shade, when participating in and attending outdoor school activities.

7. Curriculum

- Programs on skin cancer prevention and vitamin D are included in the curriculum for all year levels.
- SunSmart behaviour is regularly reinforced and promoted to the whole school community through newsletters, school homepage, parent meetings, staff meetings, school assemblies, student and teacher activities and in student enrolment packs

8. Policy Review

The school council and staff regularly monitor and review the effectiveness of the Sun Smart policy (at least every three years) and revise the policy when required.

Date of next Policy Review: July2022
